In the Specification:

Please amend the specification as follows:

Please delete the paragraph at page 6, lines 19-29 and insert the following therefor:

In some applications, it may be useful to incorporate a flexible, transparent, conductively coated layer with a rigid, transparent, conductively coated substrate such as those described above to form an interactive information device such as a computer touch panel, a personal digital assistant known as a PDA, or a computer pen input device all as disclosed in United States provisional patent application Serial No. 60/234,867, filed September 22, 2000, entitled SPACER ELEMENTS FOR INTERACTIVE INFORMATION DEVICES, now U.S. Pat. No. 6,627,918, the disclosure of which is hereby incorporated by reference herein in its entirety. Such an assembly includes an improved process and materials for producing uniformly dispersed, consistent, durable, essentially non-visible, fixed substrate-interpane-spacer elements (for example "spacer dots") for spacing opposing conductive surfaces of the flexible top sheet and rigid bottom sheet or substrate of such an interactive information device.
